## Question 2

4 of 5 points

Read the following passage and choose the correct meaning of the words given below:

My conclusion is that a scientific society can be stable, given certain conditions. The first of these is a single government of the whole world, possessing a monopoly of armed forces; and therefore able to enforce peace. The second condition is a general diffusion of prosperity, so that there is no occasion for envy of one part of the world by another. The third condition(which supposes the second fulfilled) is a low birth -rate everywhere, so that the population of the world becomes stationary or nearly so. The fourth condition is the provision for individual initiative both at work and play and the greatest diffusion of power, compatible with maintaining the necessary political and economic framework.
